My Y Story from the Matteo Family

We are so glad we chose the Berlin YMCA Little Huskies program. The development we have seen in our daughter over the past year is fantastic. She is doing awesome.

There are so many great things about this program. All of the staff are great and we have no worries. We are very comfortable with her being there. Plus the price is very affordable. You can't beat it.

It is located at her elementary school that she will go to. The principal includes the Little Huskies in school activities so she is already getting comfortable with the school. It will be a smooth transition to kindergarten.

Her favorite thing about school is playing with her friends especially her best friend Mylee.

It's normal to be nervous when your first born starts child care. She transitioned very quickly though and by the second week when I picked her up she wanted to stay with her friends instead of going home. A student named Fiona who was in her last year of preschool, did a great job making Gianna feel happy and comfortable. It is such a positive atmosphere with lots of encouragement.

I love the tadpole app too, seeing her daily progress report and photos. (The app is the TeachingStrategies® tadpoles® communication system to communicate with parents so you see your child's daily activities and photos.) It is a great way to learn about what she did at school and then I talk about it with her.

I would recommend this program.
